ABOUT YOUR TEACHERS

GAEL O'LEARY is a professional artist who has exhibited successfully in both New Zealand and Australia, and has major sculptural commissions in Australia, New Zealand and the USA.

A qualified teacher, Gael has a Diploma in Printmaking, a Bachelor of Arts and a Master of Arts (Hons Art History). In 1995 Gael completed her Master of Fine Arts (Sculpture) at the Victorian College of the Arts, Melbourne University.

ANNA ROBERTSON is a qualified teacher who has been working with Gael for many years. She has worked as an assistant in a teaching capacity and under contract to assist with Gael's major commissions. A talented sculptor, Anna has exhibited successfully and continues to explore and experiment as she continues on her sculptural journey

BACKGROUND

Bayside Sculpture seeks to affirm and encourage the innate creativity in each person, particularly through the medium of sculpture and related art forms.

While Bayside Sculpture is open to everyone, there is a particular emphasis on encouraging women to further their artistic development through the medium of sculpture.

We offer a supportive, creative environment where self-expression is encouraged. New ways of exploring the visual arts, particularly sculpture, are promoted and innovative art practices explored.

We also have seven resident sculptors on site whose studio work provides inspiration and creative energy.

If you wish to have fun and experience a creative, supportive environment, Bayside Sculpture is the place for you!

Please Note:

If you miss a class, every effort is made to make a replacement class available. However, missed classes cannot be held over to the following term.

SCULPTURE

Sculpture is both challenging and a lot of fun, with a wide range of expressive possibilities. Experience is not necessary and you will be enabled to work at your own pace and level. Materials such as clay, plaster, wax, plaster bandage, wire, sandstone and soapstone may be used. Modelling, construction and carving will be offered and processes such as creating armatures, mould-making and casting will be taught. The main thing is that you enjoy what you are doing and are open to the challenge of extending yourself.
